QUALITY POLICY

Our supplier is a quality conscious company that believe in producing products that can withstand all quality parameters. With their long experience producing goods made from the finest materials with delicate designs and patterns.

Rigorously checked against many parameters at different stages of production, these are highly durable products that serve for more than a lifetime.

CUSTOMIZATION

Gulati Metalcrafts have gained extensive specialization in manufacturing customized products. Their work force is highly skilled and experienced producing products that can be match to the exact customer demands.

They can also recreate replicas of any design with 100% accuracy.

Their manufacturing unit is based in Moradabad (U.P), India, and is equipped with the latest machinery and technology to produce a wide range of superior quality brassware. Making use of this infrastructure, Their highly skilled craftsmen have produced delicate and elegant products that have gained world acceptance and popularity.

Their flexible production unit and strong workforce, enable them to overcome any delays and fulfill all customer requirements in time.

HOW IT IS DONE

Raw material used in the manufacture of brass products are called “SILLY” and “GULLY” in the local jargon. “SILLY” and “GULLY” is the mixture of many metals namely- Copper, Zinc, Lead, etc.(in a specified ratio). All these metals mixed in a vat called “GHARIA” and heated in a furnace. The molten mix is then poured into a mold of desired shape and allowed to cool. First the design of the product to be made, is sketched followed by making its wooden frame which is later used to make its metal prototype. This is known as Masterpiece.

The expert artisans also known as “DHALLAIYA” prepares the mould for the different products. Molten metal is poured into these moulds, the product is then taken out for repair and refurbished with utmost care. These brass items are then polished. If needed, exotic design are added to these polished pieces. The product is then ready to be exported out to various countries.
